JENNINGS'S INDIA RUBBER TUBE COCKS AND WATER CLOSETS.

These Cocks and Water Closets have now been BEFORE THE PUBLIC FOUR YEARS. From the first all Scientific Persons acknowledged their simplicity, and doubted their durability. Time has proved that the INDIA RUBBER TUBES will stand the greatest pressure, and WEAR LONGER THAN any kind of METAL, in proof of which they are to be found in all the Large Water and Gas Works, Vinegar Works, Soap Manufactories, Breweries, Distilleries, Prison & Lunatic Asylums, Hospitals, &c. &c. and references of the highest order will be given to any persons making application.

EVERY CLOSET supplied by GEORGE JENNINGS is WARRANTED FOR THREE YEARS; and, at the end of THREE YEARS, fitted with a New India Rubber Tube, and made EQUAL TO NEW FOR 1s.

Illustrated Particulars sent free on application to GEORGE JENNINGS, 39, Great Charlotte-street, Blackfriars-road.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into old dwellings of the working classes, by the adoption of such an arrangement of cheap soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse, by preventing the enormous waste of water in places of this description, to which water companies now so strongly and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted by propping the valve, weighting the handle, or by other means. It is so constructed that, as long as the discharge-valve remains open, a further supply cannot enter the service-box from the main.—Drawings and description may be obtained from STOCK and SON, Manufacturers of Plumbers' Brass-work, Sanitary Closets, Rotary Screw-down Taps, Fire Plugs, Gas Fittings, and Church Furniture in iron and brass, Temple-street, Birmingham.

REDUCTION of PRICE in UNGLAZED DRAIN PIPES.

Manufactured by CHAS. FRANCIS and SONS, NINE-ELMS.

The price in future will be,

6in. 24in.	per foot for the 2 inch bore.		
6in. 24in.	"	4	"
6in. 24in.	"	6	"
9in. 24in.	"	9	"
12in. 24in.	"	12	"
18in. 24in.	"	18	"

These pipes are made under steam pressure and burnt to great hardness, and are capable of bearing nearly double the hydraulic pressure of ordinary glazed pipes. The prejudice against red-ware is overcome by this manufacture. And it is well known that good earthenware, UNGLAZED, is the oldest material discovered in a perfect state in Rome, Babylon, Nineveh, &c. &c.
